**ITU World Telecommunication/ICT Indicators Long Questionnaire**

No.	Indicator	Definition	Data	Remark
1	<b>i4213tffb</b> - Fixed - broadband subscriptions	<b>i4213tffb - Fixed - broadband subscriptions</b> = previous indicator on fixed (wired)-broadband subscriptions (i4213tffb) + satellite broadband (i271s) + terrestrial fixed wireless broadband (i271fw) . <b>Fixed - broadband subscriptions</b> refers to fixed subscriptions to high - speed access to the public Internet ( a TCP/IP connection ) , at downstream speeds equal to, or greater than, 256 kbit/s. This includes cable modem, DSL, fibre-to-the - home / building, other fixed (wired) - broadband subscriptions, satellite broadband and terrestrial fixed wireless broadband. This total is measured irrespective of the method of payment. It excludes subscriptions that have access to data communications (including the Internet) via mobile- cellular networks. It should include fixed WiMAX and any other fixed wireless technologies. It includes both residential subscriptions and subscriptions for organizations.		
2	<b>i4213tffb_o</b> - Fixed –broadband subscriptions for organizations	<b>i4213tffb_o - Fixed-broadband subscriptions for organizations</b> refers to the total subscriptions contracted by public and private organizations (i.e. non-residential customers) to access the public Internet at a fixed location at downstream speeds greater than, or equal to, 256 kbit/s. This includes cable modem, DSL, fibre-to-the-home/building and fixed wireless broadband technologies. It excludes residential subscriptions and subscriptions that have access to data communications (including the Internet)via mobile networks.		

**ITU World Telecommunication/ICT Indicators Long Questionnaire**

3	<b>i4213cab</b> - Cable modem Internet subscriptions	<b>i4213cab - Cable modem Internet subscriptions</b> refers to the number of Internet subscriptions using a cable modem service to access the Internet, at downstream speeds greater than, or equal to, 256 kbit/s. Cable modem is a modem attached to a cable television network.		
4	<b>i4213dsl</b> - DSL Internet subscriptions	<b>i4213dsl - DSL Internet subscriptions</b> refers to the number of Internet subscriptions using digital subscriber line (DSL) services to access the Internet, at downstream speeds greater than or equal to 256 kbit/s. DSL is a technology for bringing high bandwidth information to homes and small businesses over ordinary copper telephone lines. It should exclude very high-speed digital subscriber line (VDSL) subscriptions if these are provided using fibre directly to the premises.		
5	<b>i4213ftth/b</b> - Fibre-to-the-home/building Internet subscriptions	<b>i4213ftth/b - Fibre-to-the-home/building Internet subscriptions</b> refers to the number of Internet subscriptions using fibre-to-the-home or fibre-to-the-building, at downstream speeds equal to, or greater than, 256 kbit/s. This should include subscriptions where fibre goes directly to the subscriber's premises or fibre-to-the-building subscriptions that terminate no more than 2 metres from an external wall of the building. Fibre-to-the-cabinet and fibre-to-the-node are excluded.		

**ITU World Telecommunication/ICT Indicators Long Questionnaire**

6	<b>i4213ob</b> - Other fixed (wired)-broadband subscriptions	<b>i4213ob - Other fixed (wired)-broadband subscriptions</b> refers to Internet subscriptions using other fixed (wired)-broadband technologies to access the Internet (other than DSL, cable modem, and fibre), at downstream speeds equal to, or greater than, 256 kbit/s. This includes technologies such as ethernet LAN, and broadband-over powerline (BPL) communications. Ethernet LAN subscriptions refer to subscriptions using IEEE 802.3 technology. BPL subscriptions refer to subscriptions using broadband-over-powerline services. Users of temporary broadband access (e.g. roaming between PWLAN hotspots), users of WiMAX and those with Internet access via mobile-cellular networks are excluded.		
7	<b>i271s</b> - Satellite broadband subscriptions	<b>i271s - Satellite broadband subscriptions</b> refers to the number of satellite Internet subscriptions with an advertised download speed of at least 256 kbit/s. It refers to the retail subscription technology and not to the backbone technology.		
8	<b>i271fw</b> - Terrestrial fixed wireless broadband subscriptions	<b>i271fw - Terrestrial fixed wireless broadband subscriptions</b> refers to the number of terrestrial fixed wireless Internet subscriptions with an advertised download speed of at least 256 kbit/s. This includes fixed WiMAX and fixed wireless subscriptions, but excludes occasional users at hotspots and Wi-Fi hotspot subscribers. It also excludes mobile-broadband subscriptions where users can access a service throughout the country wherever coverage is available.		
9	<b>i4213_256 to 2</b> - 256 kbit/s to less than 2 Mbit/s subscriptions	<b>i4213_256 to 2 - 256 kbit/s to less than 2 Mbit/s subscriptions</b> refers to all fixed (wired)-broadband Internet subscriptions with advertised downstream speeds equal to, or greater than, 256 kbit/s and less than 2 Mbit/s.		

**ITU World Telecommunication/ICT Indicators Long Questionnaire**

10	<b>i4213_2 to 10</b> - 2 Mbit/s to less than 10 Mbit/s subscriptions	<b>i4213_2 to 10 - 2 Mbit/s to less than 10 Mbit/s subscriptions</b> refers to all fixed (wired)-broadband Internet subscriptions with advertised downstream speeds equal to, or greater than, 2 Mbit/s and less than 10 Mbit/s.		
11	<b>i4213_G10</b> - Equal to or above 10 Mbit/s subscriptions	<b>i4213_G10 - Equal to or above 10 Mbit/s subscriptions</b> refers to all fixed (wired)-broadband Internet subscriptions with advertised downstream speeds equal to, or greater than, 10 Mbit/s.		
12	<b>i271mw</b> - Active mobile - broadband subscriptions	<b>i271mw - Active mobile - broadband subscriptions</b> refers to the sum of active handset-based and computer-based (USB/dongles) mobile-broadband subscription to the public Internet. It covers actual subscribers, not potential subscribers, even though the latter may have accessed the Internet in the last three months. It includes subscriptions to mobile-broadband networks that provide download speeds of at least 256 kbit/s (e.g. WCDMA, HSPA, CDMA2000 1x EV-DO, WiMAX IEEE 802.16e and LTE), and excludes subscriptions that only have access to GPRS, EDGE, and CDMA 1x RTT.		

**ITU World Telecommunication/ICT Indicators Long Questionnaire**

13	<p><b>i271mb_active - Data and Voice Mobile-Broadband subscriptions</b></p>	<p><b>i271mb_active - Data and voice mobile-broadband subscriptions</b> refers to subscriptions to mobile-broadband services that allow access to the open Internet via HTTP and in which data services are contracted together with voice services (mobile voice and data plans) or as an add-on package to a voice plan. These are typically smartphone-based subscriptions with voice and data services used in the same terminal. Data and voice mobile-broadband subscriptions with specific recurring subscription fees for Internet access are included regardless of actual use. Prepaid and pay-use data and voice mobile-broadband subscriptions should only be counted if they have been used to access the Internet in the last three months. M2M subscriptions should be excluded. The indicator includes subscriptions to mobile networks that provide download speeds of at least 256 kbit/s (e.g. WCDMA, HSPA, CDMA2000 1x EV-DO, WiMAX IEEE 802.16e and LTE), and excludes lower-speed technologies such as GPRS, EDGE and CDMA 1xRTT.</p>		
----	---	---	--	--

**ITU World Telecommunication/ICT Indicators Long Questionnaire**

14	<p><b>i271md - Data-only mobile-broadband subscriptions</b></p>	<p><b>i271md - Data only mobile-broadband subscriptions</b> refers to subscriptions to mobile-broadband services that allow access to the open Internet via HTTP and that do not include voice services, i.e. subscriptions that offer mobile broadband as a standalone service, such as mobile-broadband subscriptions for datacards, USB modem/dongle and tablets, Data-only mobile-broadband subscriptions with recurring subscription fees are included regardless of actual use. Prepaid and pay-per-use data-only mobile-broadband subscriptions should only be counted if they have been used to access the Internet in the last three months. M2M subscriptions should be excluded. The indicator includes subscriptions to mobile networks that provide download speeds of at least 256 kbit/s (e.g. WCDMA, HSPA, CDMA2000 1x EV-DO, WiMAX IEEE 802.16e and LTE), and excludes lower-speed technologies such as GPRS, EDGE and CDMA 1xRTT. It excludes data subscriptions that are contracted together with mobile voice services.</p>		
15	<p><b>i271mwa - Active subscriptions to LTE/WiMAX mobile-broadband networks</b></p>	<p><b>i271mwa - Active subscriptions to LTE/WiMAX mobile-broadband networks</b> refers to subscriptions that have generated Internet traffic in the last 90 days in LTE/WiMAX and other advanced mobile-broadband networks, such as LTE-Advanced and WirelessMAN. It excludes subscriptions having generated Internet traffic only in HSPA, UMTS, EV-DO and previous 3G networks, and also excludes fixed WiMAX subscriptions.</p>		

**ITU World Telecommunication/ICT Indicators Long Questionnaire**

16	<p><b>i4213_2x</b> - Subscriptions to fixed-broadband and fixed-telephone bundles</p>	<p><b>i4213_2x - Subscriptions to fixed-broadband and fixed-telephone bundles</b> refers to the number of bundled telecommunication subscriptions including fixed-broadband and fixed telephone services. Only those subscriptions that meet the criteria established in the definition of bundled telecommunication services should be included. Subscriptions that include additional telecommunication services – such as triple play subscriptions including fixed telephony, fixed broadband and pay TV – should be excluded.</p>		
17	<p><b>i4213_3x</b> - Subscriptions to fixed-broadband, fixed-telephone and pay-TVbundles</p>	<p><b>i4213_3x - Subscriptions to fixed-broadband, fixed-telephone and pay -TV bundles</b> refers to the number of bundled telecommunication subscriptions including fixed-broadband, fixed-telephone and pay -TV services. Only those subscriptions that meet the criteria established in the definition of bundled telecommunication services should be included. Subscriptions that include additional telecommunication services – such as quadruple play subscriptions including fixed telephony, fixed broadband, pay TV and mobile voice/data – should not be counted under this indicator.</p>
