The tender covers 29 townships and 4 main towns. Approximately 252 of the village tracts in the 29 townships have covered areas of less than 50% and 377 have less than 80% of population. Except in the case of the 4 towns and Chipwi Township, all of the VTs with less than 80% coverage must be covered by bidders to reach at least 50% population coverage. The required number of VTs which must be targeted to reach 80% population coverage in each township (*tentatively* a total of 322) are provided in the above table and are also summarized in the box above each of the township coverage maps in this Annex A. These are also indicated as targets in the detailed VT table following the maps.

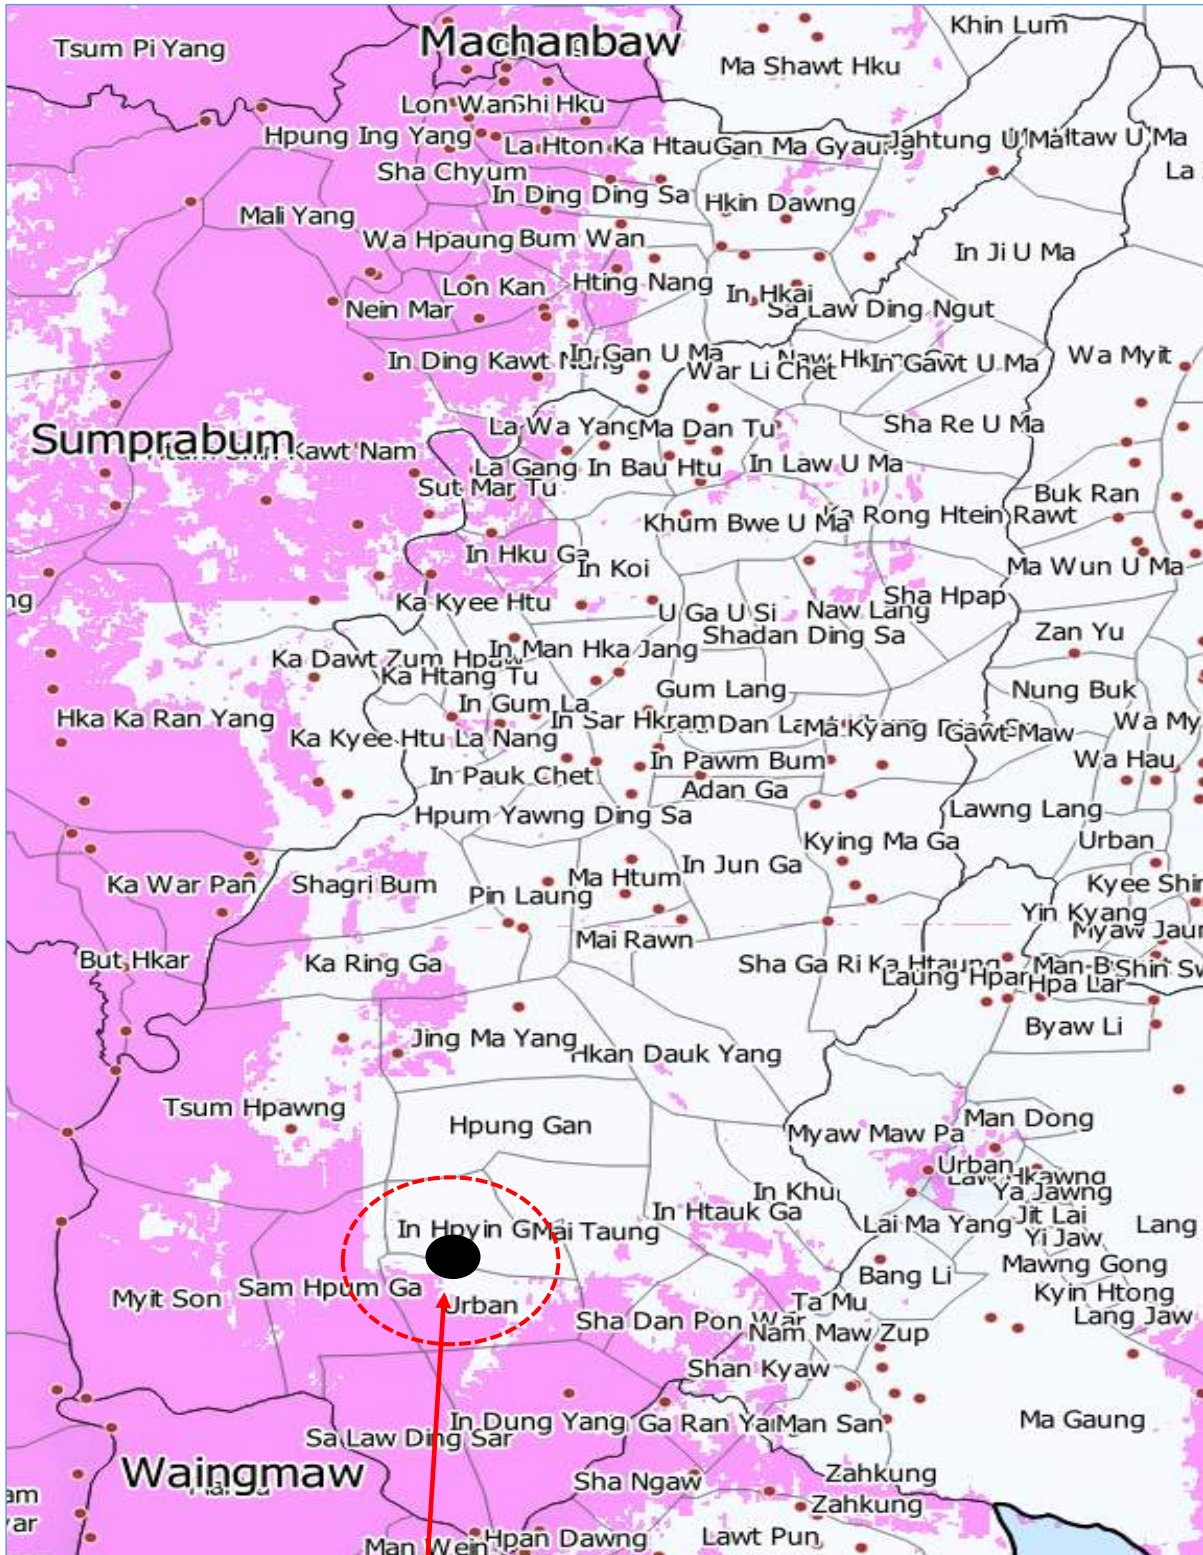

Note (1) - The number of new towers expected in Chipwi Township and the target for VT coverage amounts to partial coverage (approximately 60%) of the uncovered population, hence the number of underserved VTs targeted is reduced from 38 to 16.
